3625

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 March 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-70 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-70 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☒ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 2.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION***Claim Objections***

Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1 recites that the transferable item price is associated with a first consumer, and that the second consumer is entitled to purchase an item based on the transferable item price. However, claim 11 recites that the consumers pay a retail price which is different from the transferable item price. Please note that claim 11 contradicts claim 1. For examination purposes, the examiner will assume that the consumers of claim 11 are different from the first and second consumers of claim 1.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13, 15, 16, 18, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims recite the phrase "...transferable item price **may** be associated..." The use of the word "may" renders the

Art Unit: 3625

claim language indefinite since it is unclear to the examiner whether the transferable item price is or is not associated with the first consumer.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-8, 10, 12, 13, 15-17, 19-22, 27, 29, 35, 39, 40, 42-46, 48, 49-53, 56-60, and 65-70 are rejected under 35 U.S.C. 102(e) as being anticipated by Halbert et al (US Patent 6,101,484).

Referring to claims 1-7, 27, 29, 35, 56-60, and 65-70, Halbert teaches a method, apparatus, and medium storing instructions for the method of facilitating a transaction, comprising:

- a processor and storage device in communication with said processor
(Figure 1, column 7, lines 1-44);

Art Unit: 3625

- associating a transferable item price with a consumer (column 9, lines 15-17, lines 36-41);
- determining that a consumer is entitled to purchase an item in exchange for payment of an amount based on the transferable item price (column 9, lines 47-58);
- determining the transferable item price associated with the consumer (column 4, lines 23-24; column 9, lines 44-49);
- wherein the determination of the transferable item price is based on an offer received from the consumer to purchase the item in exchange for payment of an offer price, the transferable item price being based on the offer price (column 3, lines 4-8; column 7, lines 45-65);
- wherein the offer received from the consumer comprises a binding offer and the offer price is defined by the consumer (column 1, lines 39-42; column 4, lines 40-46);
- wherein the consumer defines the offer price via entering the offer price (column 9, lines 11-13);
- wherein said associating is only performed if the offer received from the consumer is accepted (column 9, lines 44-58);
- wherein the determination of the transferable item price is based on the consumer purchasing the item in exchange for payment of a purchase price, wherein the transferable item price is based on the purchase price (column 9, lines 44-58).

Art Unit: 3625

Halbert does not explicitly teach a first and second consumer. However, Halbert teaches a "co-op" (column 4, lines 4-9) which inherently has a first and second consumer since the invention of Halbert requires a group of consumers.

Referring to claim 8, Halbert does explicitly teach that the transferable item price is based on an auction bid received from the first consumer. However, please note that Halbert's method is based on the "reverse auction" model. Therefore it is inherent in the method of Halbert that the transferable item price is based on an auction bid since the method of Halbert is a type auction.

Referring to claim 10, Halbert teaches that the item price varies over time and the determination of the transferable item price is based on a time that the first consumer provides an offer (column 7, lines 45-67; column 8, lines 1-60).

Referring to claims 12 and 13, Halbert teaches that determination if the transferable item price may be associated with the first consumer is based on information associated with the first consumer (column 9, lines 11-17, lines 50-54).

Referring to claims 15, 21, 22, and 28, Halbert teaches that the transferable item price associated with the first consumer is based on a bid submitted by a second consumer and vice versa (column 9, lines 1-58). Halbert further teaches that the information is received from the first and second consumers via a web page (column 7, lines 6-21).

Referring to claims 16 and 17, Halbert teaches that the transferable item price is based on an item for sale (column 1, lines 17-26; Figure 3A; column 7, lines 45-63).

Art Unit: 3625

Referring to claims 19, 20, 45, and 46, Halbert teaches that the transferable item price is associated with the first consumer based on a task performed by the first consumer wherein the task comprises providing information (column 9, lines 11-17).

Referring to claims 39, 40, 42-44, Halbert teaches that the determination that the second consumer is entitled to purchase the item in exchange for payment of the amount based on the transferable item price is based on a restriction associated with the transferable item price (column 1, lines 17-22; column 8, lines 62-64).

Referring to claims 48, 52, and 53, Halbert teaches that the first consumer is allowed to purchase the item at the transferable item price even if the second consumer purchases the item at the transferable item price (column 9, lines 47-58).

Referring to claims 50 and 51, Halbert teaches that the transferable item price is dynamic and changes based on time (column 7, lines 45-67; column 8, lines 1-60).

Referring to claim 49, Halbert teaches that the first consumer is prevented from purchasing the item at the transferable item price if the second consumer purchases the item at the transferable item price (column 9, lines 57-58).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 11, 14, 18, 23-26, 30-34, 36-38, 41, 47, 54, 55, and 61-64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Halbert et al (US Patent 6,101,484) in view of Pallakoff (US Patent 6,269,343 B1).

Referring to claim 9, Halbert does not teach that the transferable item price is based on a price at which a third party offers to sell a similar item. However, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to have several vendors compete for selling merchandise to the co-op (first and second consumers) of Halbert. One of ordinary skill in the art would have been motivated to do so in order to provide a more competitive discount price to the consumers in the co-op.

Referring to claim 11, Halbert does not explicitly teach that the item is sold to consumers at a retail price and the transferable item price is different than the retail price. However, Halbert teaches that his method increases a supplier's overall profit by lowering the price per unit and increasing the sales volumes (column 3, lines 4-24). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to increase overall profits by reducing the price per unit below the retail price and increasing sales volume. One of ordinary skill in the art would have been motivated to do so in order to make more money.

Referring to claims 14 and 41, Halbert does not explicitly teach that the information associated with the first or second consumer comprises a credit rating. However, Halbert teaches that the information associated with first consumer is a "credit number and other pertinent information." (column 9, lines 11-13). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made,

Art Unit: 3625

to associate a credit rating with the first user. One of ordinary skill in the art would have been motivated to do so in order to ensure that the consumer had the resources to submit a legitimate offer.

Referring to claim 18 and 47, Halbert teaches the limitations of claims 12 and 1 as noted above. Halbert does not teach that the transferable item price may be associated with the first consumer based on payment of a transfer fee amount by the first consumer. However, Pallakoff teaches a method of on-line marketing wherein a consumer pays a commission after receiving a discount from a seller (column 5, lines 38-45; column 9, lines 46-67; column 10, lines 1-12; column 12, lines 16-29). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate the teachings of Pallakoff into the method of Halbert. One of ordinary skill in the art would have been motivated to do so in order to allow the system operator to make money.

Referring to claim 30, Halbert does not explicitly teach receiving the transferable item price code from the second consumer. However, Halbert teaches receiving a bid from the second user (column 9, lines 11-13). Furthermore, Halbert teaches that the bid may become a discount price if a critical mass is achieved (column 9, lines 44-58). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to receive a transferable item price code from the second consumer if a critical mass was met in the invention of Halbert. One of ordinary skill in the art would have been motivated to do so in order to promote a sale if a critical mass was achieved in the invention of Halbert.

Referring to claim 31, Halbert teaches verifying the transferable item price code received from the second consumer (column 9, lines 15-17).

Referring to claim 32, Halbert does not explicitly teach comparing the transferable item price code transmitted to the first consumer and the transferable item price code received from the second consumer. However, Halbert teaches that the bid received from the second consumer is compared to the final co-op price to determine who is eligible for the discount price (column 9, lines 44-58). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to compare the first and second consumer's transferable item price code in order to determine who was eligible for the discount price, as taught by Halbert.

Referring to claims 33 and 34, Halbert does not teach that the transferable item price code is encrypted using a hash function. However, Official Notice is taken that it is well known in the art to use a hash function encryption in electronic commerce. One of ordinary skill in the art would have been motivated to do so in order to properly secure the final discount price of Halbert.

Referring to claims 23-26, 36-38, 54, 55, and 61-64, these claims are directed at obvious modifications of previously rejected claims and are therefore rejected as well. One of ordinary skill in the art would have been motivated to modify the teachings of Halbert and Pallakoff in various ways in order to find the optimal and most efficient method of selling items and increasing profits.

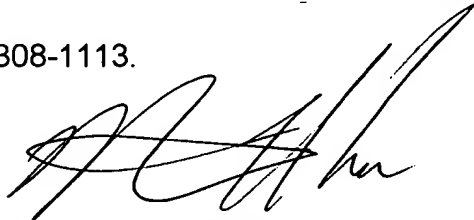

Art Unit: 3625

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naeem Haq whose telephone number is (703)-305-3930. The examiner can normally be reached on M-F 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wynn Coggins can be reached on (703)-308-1344. The fax phone numbers for the organization where this application or proceeding is assigned are (703)-305-7687 for regular communications and (703)-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-308-1113.
